### **Gator Bag Watering Instructions**

Wrap around a tree; fill it with water - that's it!

### **STEP 1**

Place back of bag against trunk, with zippers on the uphill side of tree.

Wrap both sides around trunk until zippers meet together:

Zip both sides of bag together from bottom to top.

## STEP 2

Lift up tag at top of bag to expose fill opening.

Insert water hose (up to 3" dia.), into fill opening, turn on water supply and begin filling.

Note: Fill bag only to approximately 1/4 capacity, then proceed to Step 3 below.

## STEP 3

Gently lift up on the two black straps at top of bag in order to fully expand bottom.

Note: Do not hang or suspend bag by black straps

If desired, add pre-mixed water soluble fertilizer and/or nutrients.

## STEP 4

Fill bag with water to desired level and let drain. Bag will be empty in approximately 5 to 9 hours.

Fill bag every 2 days.
